

You will need:

Milk (Must be either Whole or semi skimmed)

Food Colouring. The more colours the better

Washing up liquid

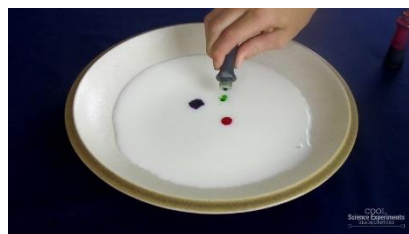

Shallow Dish or Bowl

Step 1 - Pour some milk into a shallow dish or bowl until the milk covers the bottom.

Step 2 - Add some drops of food colouring on the milk. You can use a variety of colours, just be sure to add 3-4 drops of each colour.

Step 3 - Add a drop of washing up liquid into the centre of the milk. (You could use a cotton bud covered in washing up liquid and then dip this in the centre of the milk.)

Step 4 - Watch in amazement as the colours dance across the surface of the milk!
